Project 525 CCIE Security

A structured and mentored approach
to become a CCIE in one year

The 525 project is a mentored 12-month program, created in partnership with Cisco, that aims to get candidates ready to take and pass their CCIE exam. Systematic study deepens your understanding of the field and our 525 program provides a structured pathway for disciplined learning, repeated practice, and skill mastery, enabling individuals to perform tasks more effectively and efficiently. The program involves a combination of e-learning, extensive hands-on practice, and deep dives into security protocols and technologies. Students will also be mentored throughout the duration by an experienced CCIE Security engineer.

USE CISCO LEARNING CREDITS

Use Cisco Learning Credits (CLCs) to cover program costs.

EXAMS CONDUCTED LOCALLY

Groups of Europe-based delegates will have the convenience of testing within their vicinity.

PROGRESS REPORTS

Includes a pre-assessment exam to establish the delegates' competency levels, as well as the creation of exam progress reports.

INTERNATIONALLY ACCLAIMED MENTORS AND INSTRUCTORS

Experienced mentors guide participants through the complexities of the certification process, providing personalized support to ensure success.

Benefits of the 525 Program

- **Self-study:** Set a schedule that enables you to balance your learning with other commitments
- **Mentoring:** Mentors provide real-world perspectives helping you navigate challenges while accelerating your learning through personalised feedback
- **Technical labs:** Provide disciplined and repeated practice with the structure to help you perform tasks more effectively and efficiently.
- **Bootcamps:** Provide hands-on experience that enhances understanding of theoretical knowledge by allowing practical application with real tools and technologies

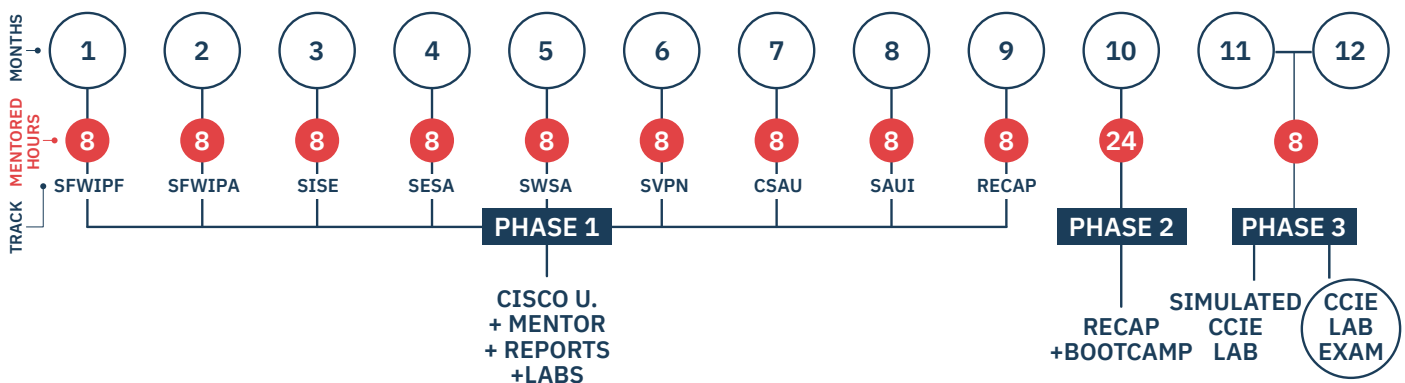

About CCIE Security

CCIE Security is one of the most prestigious and sought-after certifications in the field of network security, achieving this certification demonstrates your expertise and mastery of complex security concepts, technologies, and practices. Studying for CCIE Security equips you with in-depth knowledge of various security domains, including network infrastructure security, identity management, secure connectivity, threat management, and more. This comprehensive understanding of security principles enables you to design, implement, and manage robust security solutions that address these challenges and contribute to the security posture of the business.

Prerequisite to Join the Course:

Implementing and Operating Cisco Security Core Technologies (SCOR)

The 525 Mentored Journey to CCIE SEC

What is included:

Cisco Modelling Labs license	CCIE Security bootcamp	Mentoring from a CCIE Security certified instructor	Use of your Cisco Learning Credits (CLC)	Simulated CCIE Lab	Final exam lab + 1 rewrite* <small>*subject to T&Cs</small>
