

exclusive provider of

Project 525 CCIE Service Provider

A structured and mentored approach
to become a CCIE in one year

The 525 project is a mentored 12-month program, created in partnership with Cisco, that aims to get candidates ready to take and pass their CCIE exam. Systematic study deepens your understanding of the field and our 525 program provides a structured pathway for disciplined learning, repeated practice, and skill mastery, enabling individuals to perform tasks more effectively and efficiently. The program involves a combination of e-learning, extensive hands-on practice, and deep dives into security protocols and technologies. Students will also be mentored throughout the duration by an experienced CCIE Service Provider engineer.

USE CISCO LEARNING CREDITS

Use Cisco Learning Credits (CLCs) to cover program costs.

EXAMS CONDUCTED LOCALLY

Groups of Europe-based delegates will have the convenience of testing within their vicinity.

PROGRESS REPORTS

Includes a pre-assessment exam to establish the delegates' competency levels, as well as the creation of exam progress reports.

INTERNATIONALLY ACCLAIMED MENTORS AND INSTRUCTORS

Experienced mentors guide participants through the complexities of the certification process, providing personalized support to ensure success.

Benefits of the 525 Program

- **Self-study:** Set a schedule that enables you to balance your learning with other commitments
- **Mentoring:** Mentors provide real-world perspectives helping you navigate challenges while accelerating your learning through personalised feedback
- **Technical labs:** Provide disciplined and repeated practice with the structure to help you perform tasks more effectively and efficiently.
- **Bootcamps:** Provide hands-on experience that enhances understanding of theoretical knowledge by allowing practical application with real tools and technologies

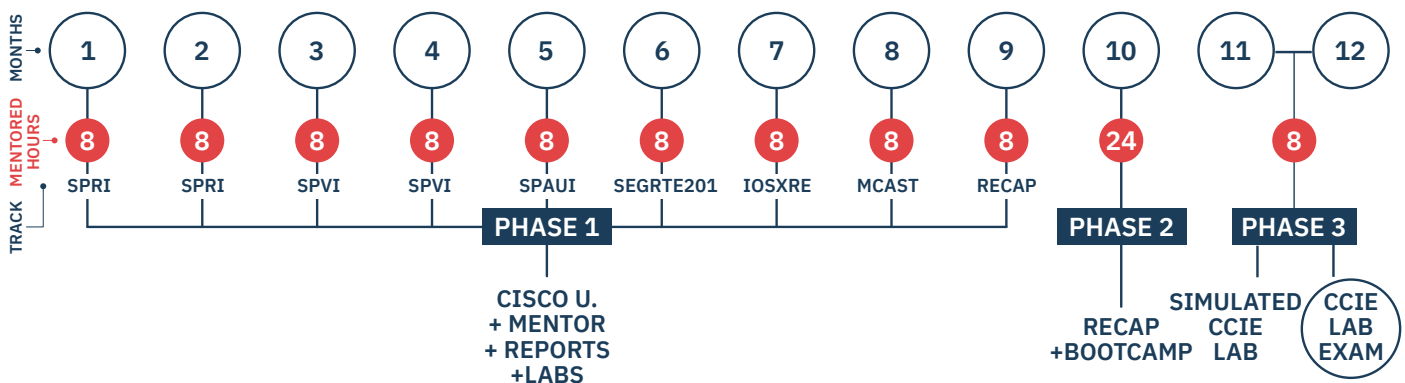

About CCIE Service Provider

CCIE Service Provider is a prestigious and globally recognized certification that validates your expertise in designing, implementing, and managing service provider networks. This certification demonstrates your advanced knowledge of technologies and protocols specific to service provider environments, such as MPLS, BGP, QoS, and multicast. By acquiring CCIE Service Provider, you establish yourself as a trusted authority in the field and significantly enhance your professional credibility. With the rise of technologies like 5G, cloud computing, and Internet of Things (IoT), service providers face increasing challenges in delivering reliable, high-performance networks.

Prerequisite to Join the Course:

Implementing and Operating Cisco Service Provider Core Technologies (SPCOR)

The 525 Mentored Journey to CCIE SP

What is included:

Cisco Modelling Labs license	CCIE Service Provider bootcamp	Mentoring from a CCIE Service Provider certified instructor	Use of your Cisco Learning Credits (CLC)	Simulated CCIE Lab	Final exam lab + 1 rewrite* *subject to T&Cs
