Project 525 **CCIE**

A structured and mentored approach
to become a CCIE in one year

The 525 project is a mentored 12-month program, created in partnership with Cisco, that aims to get candidates ready to take and pass their CCIE exam. Systematic study deepens your understanding of the field and our 525 program provides a structured pathway for disciplined learning, repeated practice, and skill mastery, enabling individuals to perform tasks more effectively and efficiently. The program involves a combination of e-learning, extensive hands-on practice, and deep dives into security protocols and technologies. Students will also be mentored throughout the duration by an experienced CCIE engineer.

USE CISCO LEARNING CREDITS

Use Cisco Learning Credits (CLCs) to cover program costs.

EXAMS CONDUCTED LOCALLY

Groups of Europe-based delegates will have the convenience of testing within their vicinity.

PROGRESS REPORTS

Includes a pre-assessment exam to establish the delegates' competency levels, as well as the creation of exam progress reports.

INTERNATIONALLY ACCLAIMED MENTORS AND INSTRUCTORS

Experienced mentors guide participants through the complexities of the certification process, providing personalized support to ensure success.

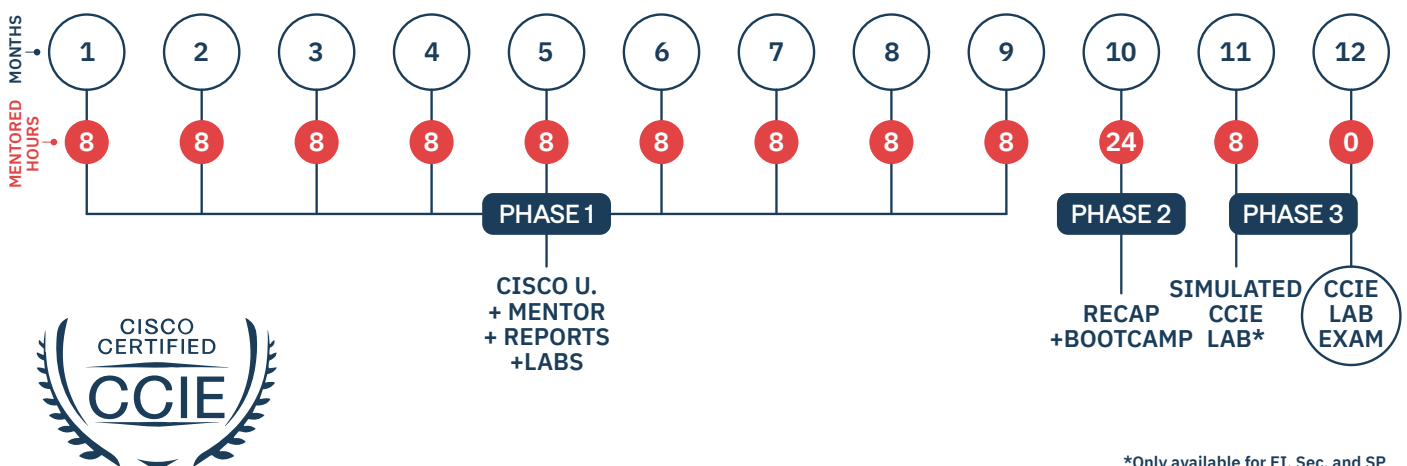

Benefits of the 525 Program

- **Self-study:** Set a schedule that enables you to balance your learning with other commitments
- **Mentoring:** Mentors provide real-world perspectives helping you navigate challenges while accelerating your learning through personalised feedback
- **Technical labs:** Provide disciplined and repeated practice with the structure to help you perform tasks more effectively and efficiently.
- **Bootcamps:** Provide hands-on experience that enhances understanding of theoretical knowledge by allowing practical application with real tools and technologies

About CCIE

The CCIE Certification is the pinnacle of networking expertise, security, service provider technologies, and data center management representing the highest level of proficiency in the field. Achieving the CCIE Certification means you have mastered the most complex aspects of network design, implementation, and troubleshooting. This prestigious credential is recognized globally as a mark of excellence, demonstrating your ability to tackle the most challenging network scenarios and deliver innovative solutions.

The 525 Mentored Journey to CCIE

*Only available for EI, Sec, and SP
